

CAMILLE MOREAU

Data Analyst | Causal Inference | Time Series Analysis | Reporting Automation

Calgary, AB (open to relocation) · camillemoreau2002@gmail.com · camilleelot.github.io

PROFESSIONAL SUMMARY

Data analyst with experience building executive dashboards, automated reporting pipelines, and causal analyses (interrupted time series, change-point detection, quasi-experimental design) in Python, SQL, and Power BI. At a large social services nonprofit, delivered board-level reporting, led a national accreditation process, authored an organizational AI governance framework, and shipped internal data tools. Published independent policy and quantitative research. Bilingual: English and Russian.

SKILLS

Data Analysis & BI: Python (pandas, NumPy, scikit-learn, seaborn, Streamlit), SQL, RQL (Rippling), Excel (pivot tables, lookups, Power Query), Power BI, D3.js

Statistics & Methods: Regression analysis, interrupted time series (ITS), change-point detection, quasi-experimental and natural experiment design, bootstrap inference, counterfactual projection, data visualization

Reporting & Analytics: Report automation, KPI dashboard development, data cleaning and validation, HR / people analytics, survey and administrative data

AI & Automation: LLM-assisted document processing, multi-agent pipeline development, AI governance and responsible AI policy (EU AI Act-informed)

Languages: English (fluent), Russian (native/bilingual)

PROFESSIONAL EXPERIENCE

Operations Administrator (Data & Reporting)

May 2025 – Dec 2025

Closer to Home Community Services — Calgary, AB

- Built KPI dashboards used by the executive team and Board of Directors for program and operational decisions; delivered recurring board-level reports.
- Automated monthly reporting workflows using Python and RQL (Rippling) queries on HR system exports, reducing manual data preparation by approximately 40%.
- Conducted voluntary turnover analysis on 70 months of HR data using change-point detection methods; identified the policy change associated with the largest retention improvement in five years (3x any other shift) and delivered a white paper to leadership.
- Managed the organization's Imagine Canada accreditation process, coordinating evidence collection and compliance documentation across departments.
- Authored an organizational AI governance framework grounded in the EU AI Act, covering acceptable use, risk classification, and review procedures.
- Developed and shipped FleetTracker, an internal fleet incident management and reporting tool, automating intake and reporting for the vehicle fleet program.
- Implemented LLM-assisted summarization of insurance documentation for the fleet program, reducing document review cycles.

Content Evaluation Specialist (AI Data Evaluation)

2024 – 2025

Outlier — Remote

- Evaluated AI-generated analytical and technical responses for factual accuracy and logical validity; maintained a top-tier quality rating throughout tenure.

SELECTED RESEARCH & PROJECTS

The Rezoning Paradox — Interrupted Time Series Analysis 2025

Independent research, camilleelot.github.io — Calgary, AB

- Measured the causal effect of Calgary's 2024 blanket rezoning on housing starts using interrupted time series with counterfactual projection and bootstrap confidence intervals; found starts 16% below pre-existing trend. Engaged University of Calgary faculty; visualizations in D3.js.

Transit Service Cuts and Voting — Natural Experiment 2026

Independent research — Calgary, AB

- Matched 225 electoral ridings to commute and transit service data across four elections to test whether transit cuts move votes; quantified a near-zero average effect ($r = -0.11$) with one anchoring exception following a \$1.5B service re-commitment.

ZERG-RUSH — Multi-Agent Media Analysis Pipeline 2026

Independent project

- Designed and built a multi-agent AI pipeline (Python, LLM APIs) that tracks narrative propagation across media ecosystems, including ingestion, classification, and reporting layers.

The Ingest Gap (Bulletin 01) — Defense Policy Brief 2026

Independent publication

- Authored an open-source intelligence (OSINT) policy brief on cold-weather FPV drone doctrine drawing on Russian-language primary sources; distributed to Canadian defense policy researchers.

EDUCATION

Bachelor of Arts, Political Science (Minor: Psychology) Expected 2026

Athabasca University

Coursework includes: Introduction to Statistics, Understanding Statistical Evidence, Research Methods
